SECRET		

7. There was a seaplane anchorage due east of the light buoy in Gryaznaya Bay (N 69-04, E 33-16). The anchorage had two ramps leading into the water, and two hangars. There were eight or nine flying boats on the ramps. They all had twin engines, and high wings; they were smaller in size than a Catalina.

a large round radar screen, which was probably mounted on wheels, on the elevation between Gryaznaya Bay and Seradin Height (N 69-04, E 33-16).

25X1

8. On the east side of Chelmpushka Bay (N 69-03, E 33-14) there was a large floating drydock; on the west side of the bay and a workshop installation. No large cranes were observed in the area.

25X1

A half-buried oil tank of medium size was observed west of Mokhnatkina Pakhta (N 69-03, E 33-11). No oil lines were observed, but there was a small wharf nearby.

25X1

on 31 July:

10.

11.

Three submarines and four or five small surface vessels at Polyarnyy.

A small patrol boat lay at the southern entrance to Polyarnyy.

the following naval vessels on the way into Murmansk

053/4

in Vayenga Bay.

. A light cruiser in the floating drydock in Chelmpushka Bay.

25**X**1

c. A light cruiser in the liteating dry dock in the impusaka bay.

d. Four or five small naval vessels moored side by side at the dockyard in Chelmpushka Bay; the vessels were red-leaded.

)• 25X1

a number of destroyers at Rosta (N 69-03, E 33-05).

There were two types of destroyers in the group; one type had two low broad stacks, and the other type had only one stack. Both types were about 325 feet long.

Two additional destroyers were also observed in the same area. These ships

25X1

Two additional destroyers were also observed in the same area. These ships were camouflaged with irregular blue and white diagonal stripes. One side of the bow on each ship was painted white, and the other was painted dark blue. Several other vessels in the area were also camouflaged. All the naval vessels had small radar screens.

12. ship was leaving Murmansk, it passed a leaving crusser which hav at anchor north of Pinagoriy Point (N 69-03, E 33-05). The crew was assembled on dock in blue jackets and white trousers

25X1 25X1

13. At the mouth of the Kola Inlet four destroyers passed

The destroyers turned eastward when they were well in the bay. Each of the destroyers had two stacks. One of them was towing a target, which consisted of two tanks connected by planks. There were two masts with canvas suspended between the masts.
